1. This action is responsive to the amendment filed on December 3, 2003.

2. The objection to the abstract of the disclosure is withdrawn in view of applicants' amendment.

3. The disclosure stands objected to because of the following informalities:

While it is appreciated that the copending foreign applications have been amended to include the corresponding publication dates, it is suggested that the publication numbers be included as well. Appropriate correction is requested.

4. The objection to claim 11 is withdrawn in view of applicants' amendment.

5. The rejection of claims 11-19 under 35 U.S.C. 103(a) as being unpatentable over Roach et al. (US Patent No. 5,759,976) is withdrawn in view of applicants' amendment. (Support for "non-phosphate" is acknowledged and found on page 22, line 30, and "zeolite-built" is properly supported on page 23, line 1.)

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1751

7. Claims 11-19 rejected under 35 U.S.C. 102(b) as being anticipated by Davies et al. (EP 0,711,828), hereinafter "Davies".

Davies teaches a process for preparing detergent tablets by providing a detergent base powder comprising 40 wt% zeolite, with no phosphates, and a total of 21 wt% surfactants; spraying 5 wt% polyethyleneglycol binder onto the base powder and tableting the mixture at 22°C, wherein the powder was stored in a temperature controlled oven for a time before carrying out the compaction step to control the temperature of compaction (see Comparative Example at page 7, line 1 to page 8, line 25). Tablets were also prepared from base powders comprising zeolite, surfactants and binder, as above, and compacted at different temperatures, i.e., 20°C and 30°C, separately (see Comparative Examples on page 8, line 26 to page 9, line 7). Davies teaches the limitations of the instant claims. Hence, Davies anticipates the claims.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference is considered cumulative to or less material than those discussed above.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 1751

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
